

CENTRIC SAP HCM ADD ON TOOLS

VBT2

COMPARISON AND CALCULATION TOOL
FOR ALL SAP HCM DATA

VBT2

COMPARISON AND CALCULATION TOOL FOR ALL SAP HCM DATA

VBT2 is an all-in-one reporting tool that replaces Query, Excel and Wage Type Reporter or complex VLOOKUPS in Excel. This will save you considerable time in the daily creation of evaluations – without any need for programming, a time-consuming introductory project or extensive training.

VBT2 can generate reports from all available SAP HCM data from a wide range of sources. While the SAP HCM data required for the report is otherwise usually evaluated and compiled via Query, Wage Type Reporter, Excel and/or the corresponding VLOOKUPS, with VBT2 this can now all be done using a single integrated tool. Combined evaluations can be created, in turn allowing calculations to be conducted on the basis of master data and time management data as well as accounting results. Evaluations are created easily without any programming effort.

Example functions and benefits

- Useful addition to SAP BI for SAP HCM experts, as it processes up-to-date data (BI not required)
- Quick evaluations and easy data provision via drag and drop
- Comprehensive calculation and logic functions, complex reports
- Automatic updating of data without regeneration (version-controlled)
- Time required for technical introduction – approx. 1 hour
- Training required – approx. 2 hours
- Numerous examples of practical applications
- Easy to use, proven SAP look and feel

Centric VBT2 sample output

Sample applications

- Easy bonus/participation calculation and simulation (compensation and benefits)
- Effective earnings reports with current salaries and past payroll results
- Deviation analysis using data from the previous period for auditing purposes and amendment of master data relevant for payments
- Accrual calculations using combined data from infotypes (current salaries), wage types and time management results such as remaining leave, as well as SAP tables, fictitious calculations for remuneration adjustments (pay increases) for simulation and cost analysis. Options for various versions and requirements, e.g. budget
- Thanks to complete integration, generated or calculated results can be automatically loaded to the respective infotypes via the Centric INF or BTC tool

The image displays three overlapping screenshots of the Centric software interface. The top screenshot shows the 'Comparison and calculation tool PNP View' with options for 'Further selections', 'Search helps', 'Sort order', and 'Org. structure'. It includes a 'Period' section with radio buttons for 'Today', 'Current month', 'Current year', 'Up to today', 'From today', and 'Other period'. Below this is a 'Selection' section with fields for 'Personnel Number', 'Employment status', 'Company Code', 'Employee group', and 'Employee subgroup'. The middle screenshot shows the 'Comparing- and Calculation-Tool' with a 'Name of Template: URL RÜCK BERECHNUNG' and 'Category: DEFAULT'. It features a 'Columns' table with columns for 'ColP', 'Columnheader (long)', 'Columnname', 'Outp', and 'Tst'. The bottom screenshot shows a detailed data table with columns for 'Gr No', 'Calc', 'SRC', 'Val.Src.', 'Tst', 'Calc.', 'Frm.', 'Frm.', and 'Frm.'. The table contains data for various calculation types and sources.

Data collection and evaluation in Centric VBT2

Reference customers

Today, more than 380 SAP HCM customers throughout Germany from all business sectors rely on SAP HCM products from Centric. We currently review more than 5 million SAP HCM personnel payroll transactions per month.

We offer a free four-week test phase so that you can obtain a good impression of what Centric tools can do in advance. As part of this test phase, we will deploy an experienced Centric SAP HCM consultant to your business location for one day, who will guide you through the set-up and first checks. This consultant is your personal contact throughout the entire test phase.

If you do not have the time or resources for a trial period, we will also gladly put you in touch with a reference customer in your vicinity. This will allow you to obtain a first impression of the various applications of Centric tools in daily business operations.

Only those who have actually tested the Centric SAP HCM Tools in their SAP HCM system will know how valuable and profitable Centric tools can be in their daily work with SAP HCM.

- Robert Bosch GmbH, Stuttgart 150,000 payroll transactions per month
- Metro AG, Düsseldorf 130,000 payroll transactions per month
- Deutsche Lufthansa AG, Hamburg 80,000 payroll transactions per month
- City of Munich, Munich 60,000 payroll transactions per month
- Evonik Industries AG, Essen 50,000 payroll transactions per month
- Dr. Ing. h.c. Porsche AG, Zuffenhausen 40,000 payroll transactions per month
- BSH Hausgeräte, Dillingen an der Donau 30,000 payroll transactions per month
- KPMG IT Service GmbH, Berlin 15,000 payroll transactions per month
- Fressnapf Tiernahrungs GmbH, Krefeld 10,000 payroll transactions per month
- Adidas AG, Herzogenaurach 10,000 payroll transactions per month
- Hugo Boss AG, Metzingen 5,000 payroll transactions per month
